

# Les Baleines Rand'eau

NOSY BE – MADAGASCAR

## Rand'eau Palmée Tortues Nosy Tanikely / Nosy Sakatia

The island of Sakatia is still very preserved. Huge green turtles take the opportunity to feed in seagrass beds called "turtle grasses".

In the marine reserve of Nosy Tanikely you will dive in a giant aquarium!

Accompanied by a specialized guide, we will take the boat (about 15 min) to reach Nosy Tanikely and observe the incredible marine flora and fauna of the reserve. We will then go to Nosy Sakatia (30 min by boat) for lunch. In the afternoon, we will swim with the green turtles on the seagrass bed.

### Planning of the day
